Orchard & Windbreak Investment Summary

Note: Most trees will be sourced from *Roots to Fruits Nursery* in the Driftless region of Wisconsin. Some specialty varieties may require shipping from other vendors (e.g., Stark Bros), which would add freight costs.

Estimated Full Project Range ~$6,500 – $10,000

Cider Orchard (32 Trees)

Traditional Cider Block (English Heritage Focus) ~$1,600
Modern-Focused Cider Block (Disease-Resistant Focus) ~$1,750

Eating & Baking Fruit Trees (Non-Cider)

Total Estimated Cost ~$2,900

Breakdown by Fruit Type

🍎 Apples (16 trees) ~$816

🍐 Pears (6 trees) ~$540

🟣 Plums (6 trees) ~$500

🍑 Peaches (6 trees) ~$300

🍒 Sweet Cherries (6 trees) ~$306

🍑 Apricots (2 trees) ~$110

🍑 Persimmons (6 trees) ~$340

Total Fruit Orchard Investment

With Traditional Cider Block ~$4,500
With Modern Cider Block ~$4,650

Sugar Maple Planting (38 Trees Total)

Primary Plan – Saplings (38 Trees)

Option A – 6–7 ft Saplings ($45 each)
~**$1,710**
Estimated tapping timeline: ~18–22 years

Option B – 2–3 ft Whips ($15 each)
~**$570**
Estimated tapping timeline: ~20–25 years
Approximately 3–5 years slower than Option A

Optional Upgrade – Large 2.5" Caliper Trees

Up to 3 feature trees can be installed near high-visibility areas.

Estimated cost per tree: ~$300–$400
3 trees: ~**$1,050**

This is presented as an aesthetic and time-to-impact upgrade rather than part of the core maple investment.

Arborvitae Windbreak

Thuja Green Giant Variety

Option 1 – 6 ft Spacing (Dense Privacy Wall)

159 trees
~**$3,180** (assuming ~$20 per tree)

Option 2 – 12 ft Spacing (Moderate Windbreak)

79 trees
~**$1,580** (assuming ~$20 per tree)

Larger tree sizes may increase cost toward ~$35+ per tree.

Alternative Cost-Saving Strategy

Propagating cuttings from existing arborvitae would significantly reduce plant cost, with the primary investment being time and grow-out period.
